

## ACICLOVIR (tablet)

ay-sye-kloe-veer

### What does it do?

*Acidovir* is used to treat and prevent viral infections such as herpes and shingles.

### Before you start

- Tell your doctor if you have kidney problems, or have ever had a seizure.
- Tell your doctor if you are pregnant, planning to become pregnant, or breastfeeding.

### How should you take it?

Take *acidovir* regularly as directed. Keep taking it until the course is finished, even if you start to feel better. Take the tablets with a glass of water. You can also dissolve the tablets in a glass of water before taking.

### What if you forget a dose?

Take the missed dose as soon as possible and continue as directed.

### Can you take other medicines?

Tell your pharmacist or doctor about all medicines or treatments that you may be taking, including vitamins, herbal products or recreational drugs.

### What side effects might you notice?

| Side Effects                                                                                                                     | Recommended action              |
|----------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| Seizures<br>Reduced number of blood cells that help your blood to clot - symptoms include: easy or unusual bruising or bleeding  | Tell your doctor immediately    |
